

✦ Assignment: CRUD Operations Using Scaffolded Database

🎯 Objective

The goal of this assignment is to help you understand and implement CRUD Operations (Create, Read, Update, Delete) using Database Scaffolding in ASP.NET Core.

📋 Scenario

You are building a simple System.

A database is already available, and your task is to scaffold it and build full CRUD functionality.

📊 Database Requirements

📋 Scaffold the Database

Use the following command to generate Models and DbContext:

Scaffold-DbContext

"Server=SALAMA\SALAMA;Database=Company_SD;Trusted_Connectio

n=True;Encrypt=False;" Microsoft.EntityFrameworkCore.SqlServer
-OutputDir Models

Dont forget change it :D

🔧 Implement CRUD Operations

✓ Create

Add a new record

Apply validation:

Name is required

Age must be greater than 18

📖 Read

Display all (List)

Display details of a single student

✎ Update

Edit existing data

Ensure updated data is saved correctly

✕ Delete

Delete a data

Add a confirmation step before deletion
